

A**Evidence chain from data files to defensible claims**

Model-ready does not automatically mean evidence-ready for a chemistry-sensitive claim.

B**Claim determines evidence****Prediction**

features · targets · units

Screening

rank stability · traceability

Chemistry claim

formula · charge · curation

Mechanism

interpretable domain evidence

C**Keep evidence states distinct****Validated + observable**

curated and directly visible

Validated, not observable

trusted source; field absent

Uncertain + observable

visible but not independently validated

Uncertain, unobservable

missing from parsed representation

Flagged / inconsistent

warning or detected conflict

D**Complementary resource roles****MOSAEC / CoRE**

chemistry and provenance anchors

ARC-MOF

adsorption/process ML stress test

QMOF

DFT / quantum-property contrast

Reusable output

claim maps + split-aware benchmarks

Not observable $\neq$ chemically invalid.
